

Cleaning & Sanitizing brewing equipment are one of the most important ways risks maintain the taste and hygiene and a quality of the beer otherwise it risks damaging not only the system but give a blow to the taste and the quality of a new batch of beer. For this Kegs must be cleaned and sanitized thoroughly between each fitting.

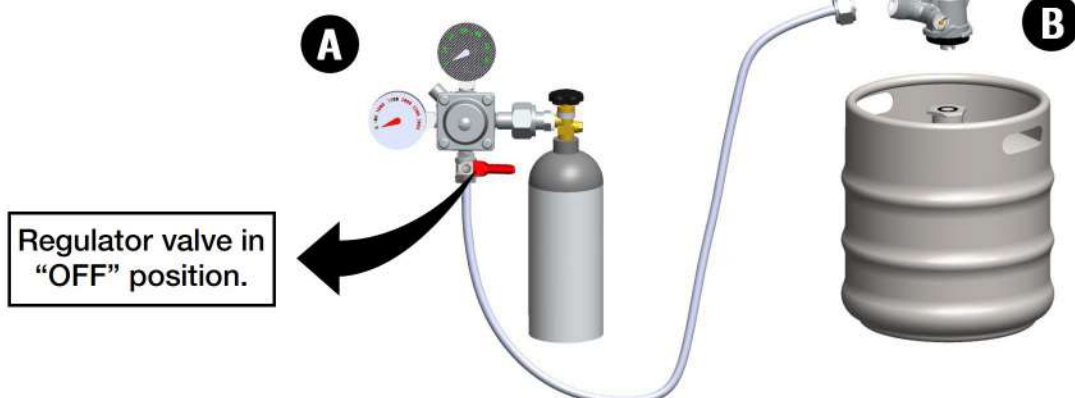

## Four Steps

Disassembling	Cleaning	Rinsing	Reconnect
<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>

### 1. Disassembling

- Turn off CO2 Supply
- Remove Coupler from Keg
- Remove Fitting from Keg Coupler
  - Beer Hose and
  - CO2 gas pressure hose fitting
- Turn clockwise to remove faucet from tower with the use of faucet wrench.
